SUMMARY

Computer Science undergraduate with hands-on full-stack development experience across React, Node.js, Express.js, MongoDB, Python, and Java. Delivered eight end-to-end projects spanning AI-integrated platforms, REST APIs, interactive web applications, and automation tools. Certified in Data Analytics and Cyber Security (Deloitte/Forage). Strong communicator and team player with a consistent record of meeting deadlines and adapting quickly to new technologies.

EDUCATION

GLA University <i>Bachelor of Technology in Computer Science</i>	Expected June 2027
Euro International School <i>Higher Secondary Certificate (Class XII) – Gurugram, Haryana</i>	May 2023
Euro International School <i>Secondary Certificate (Class X) – Gurugram, Haryana</i>	May 2021

EXPERIENCE

GLA University <i>Trainee – Frontend & Backend Web Development Training</i>	Jun 2025 – Jul 2025
- Completed intensive training in Frontend and Backend Web Development, gaining hands-on experience with HTML, CSS, JavaScript, and server-side integration to build dynamic web applications. - Developed a computer vision application using Azure Cognitive Services, improving image processing capabilities for a real-world use case.	

PROJECTS

Task Manager

Technologies: MongoDB, Express.js, React, Node.js, JavaScript

- Built a full-stack task management application using the MERN stack, enabling users to create, update, track, and manage tasks through a clean, responsive interface.
- Developed RESTful APIs with Express.js and Node.js for full CRUD operations, backed by a MongoDB database for efficient task data storage.
- Designed an intuitive React frontend with real-time task updates and a fully responsive layout across all devices.

Real Estate Website

Technologies: React, Node.js, GPT-4.1 API, Web Scraping, REST APIs

- Built a full-stack platform that fetches and displays real-time property listings with AI-powered dynamic search.
- Integrated GPT-4.1 API for intelligent filtering and personalized property recommendations.
- Developed backend services for web scraping, data processing, and API handling with secure user-owned API key support.

Hospital Management System

Technologies: React, Express.js, MongoDB, Node.js, REST APIs

- Built a full-stack application for managing patient records, appointments, and doctor profiles.
- Designed MongoDB schemas and developed REST APIs using Express.js for efficient data operations.
- Created an interactive React frontend for real-time data access and dashboard functionality.

Mood-Based Music Recommendation System

Technologies: JavaScript, HTML, CSS, Third-Party APIs

- Developed a web app that recommends songs based on user-selected mood via third-party music APIs.
- Implemented a dynamic frontend with real-time API integration; collaborated in a team on frontend and API modules.

Solar System Explorer

Technologies: HTML, CSS, JavaScript

- Built an interactive web application enabling users to explore planets and celestial bodies through a visually engaging interface.
- Implemented detailed planetary profiles covering size, distance from the Sun, orbital period, and unique characteristics with dynamic content rendering.
- Designed responsive layouts and interactive animations to deliver an immersive, accessible learning experience across all devices.

Tesla-Inspired Landing Page

Technologies: HTML5, CSS3, JavaScript, Git, GitHub

- Built a Tesla-inspired landing page with a modern dark-themed interface and fully responsive layout optimized for all screen sizes.
- Implemented smooth animations, interactive vehicle selection, and engaging UI elements to enhance user experience.

Personal Portfolio Website (kritipandey125-1gtm.github.io/portfolio/)

Technologies: React, GitHub Pages

- Built a responsive portfolio with interactive UI, animations, and project showcases; implemented dark/light theme toggle.
- Deployed live on GitHub Pages with smooth navigation and optimized performance.

File Organizer

Technologies: Python

- Automated file organization by type using a Python CLI tool; added hash-based duplicate detection to optimize storage.

TECHNICAL SKILLS

Languages:	Python, Java, JavaScript, HTML, CSS
Frontend:	React, Responsive Design, UI Animations
Backend:	Node.js, Express.js, REST API Design
Databases:	MongoDB, Database Schema Design
Cloud & AI:	Azure Cognitive Services (Computer Vision), GPT-4.1 API
Dev Tools:	Git, GitHub, GitHub Pages

CERTIFICATIONS

- | | |
|---|---|
| • Python Programming – Ducat Training School | • Management Information System – NPTEL |
| • Java Programming – Ducat Training School | • Generative AI Studio – Google Cloud × Simplilearn |
| • Data Analytics Virtual Internship – Deloitte Forage | • E-Business – NPTEL |
| • Cyber Security Virtual Internship – Deloitte Forage | • Introduction to Environmental Engineering – NPTEL |
| • Full Stack Web Development – CEA, GLA University | • Cyber Security Assessment – LearnTube.ai |

ACTIVITIES

- **Entrevista 3.0** GFG Student Chapter, GLA University (Apr 2025): Competed in a technical interview-skills event focused on data structures, algorithms, and problem-solving.
